DETAILED ACTION

Claims 17 and 18 have been amended. Claims 1, 2, 4-9, 11, 12, 14-19 are pending and under consideration.

Applicant argues that due to the amendment to claims 17 and 18, no determination of filing date is required. This has been considered but not found persuasive. A determination of benefit of earlier effective priority date is necessary for all pending claims. It is re-stated that claims 1, 2, 4-9, 11, 12 and 14-16, limited to the detection of SA Beta-Gal and/or p21 are given priority to 60/176,515 and 60/176,514, both filed January 12, 2000. Claims 17-19, incorporating markers in the instant method not described in the provisional documents, will have an effective priority date of January 12, 2001.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 17-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Amended claims 17 and 18 now recite “detecting in the first and second tissue or cell samples “both p27 expression and p16 expression”. This is not supported by the originally filed disclosures which recites on the detection of p21, p16 and p27 in the alternative (for instance page 8, line 10, and the originally filed claim 3). It is noted that the detection of both of SA-beta Gal and p21 is supported by the originally filed disclosure (page 12, Example 5). One of skill in the art would reasonably conclude that applicant was not in possession of the instant invention of amended claims 17-19 as said claims are drawn to the detection in the first and second samples of both p27 and p16.

Art Unit: 1643

All other rejections and objections as set forth or maintained in the prior Office action are withdrawn in light of applicant's amendments.

Claims 1, 2, 4-9, 11, 12, 14-16 are allowable.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
